

PARKING ADVICE

1. **To protect your car** – park close to the kerb, turn your wing mirrors in and put your aerial down
2. **Leave enough room** for the people you have parked near to get out without bumping you
3. **Make sure there's access for Emergency vehicles** eg: a fire engine, to get past your vehicle
4. **Keep the sight line clear at junctions** (at least 10 metres) so that other drivers can see around your vehicle to pull out safely
5. **Don't park** -
 - across driveways,
 - in disabled bays
 - on the pavements (they are for pedestrians, pushchairs and wheelchairs)
 - so that you block cycle access between the brick planters in Avenue Road or Gordon Avenue
 - on double yellow lines
 - where the kerb has been lowered to help wheel chair users
6. **At night**
 - Noise carries further at night so please don't over-rev your engine or slam doors late at night or early in the morning
 - Don't use your horn between 11:30 pm and 07:00 am (The Highway Code Rule 92)
7. **And you might get a parking ticket if...**
 - you're not displaying a Parking Permit or Visitor's Parking Permit where there is Residents' Parking
 - you park your vehicle or trailer on the road where it would endanger, inconvenience or obstruct pedestrians or road users. (The Highway Code paragraph 217)
 - you park on double yellow lines or on the pavement
